

PLANT SPECIES LIST

Plant species list for all known species within the geographical extent defined by the GIS mapping and analysis research, “Landscape-scale Patterns of Grassland, Shrubland, and Woodland Vegetation Abundance in Relation to Environmental and Disturbance Variables”, by Eric Pfaff. (See research documentation for details, but the study area is within the Applegate Adaptive Management Area, Medford District BLM, Oregon). Species records are sorted alphabetically by scientific name. Names and codes follow the USDA PLANTS database (USDA 2006). Data collected and compiled by Eric Pfaff.
