OREGON STATE UNIVERSITY

ARTICULATION AGREEMENT

For

TRANSFER of COURSES BETWEEN CHEMEREKA COMMUNITY COLLEGE and OREGON STATE UNIVERSITY – CASCADES CAMPUS

2003-2004 Catalog

It is agreed that students transferring from Chemeketa Community College having completed their Associate of Horticultural Science, Viticulture with the courses listed in this agreement will be granted the following course equivalencies in the Bachelor of Science degree in Horticulture program at Oregon State University. This agreement is based on the evaluation of the rigor and content of the Associate of Horticultural Science requirements at Chemeketa Community College and the BACC Core requirements at OSU along with and the Bachelor of Science degree requirements in Horticultural Science. This agreement is subject to yearly re-evaluation by both schools for continuance.

Students may transfer a maximum of 124 credits towards a Baccalaureate degree at OSU.

Dated this 24th of November, 2003

RE: Articulation of Chemeketa Viticulture Courses

As you know, representatives of OSU and Chemeketa Community College have been meeting over the last year to devise ways to expedite transfer of viticulture and enology students from Chemeketa to OSU. Members of the Horticulture Department, Food Science and Technology Department, and Chemeketa's Vineyard Management / Winemaking Program have periodically met to discuss ways that our departments could cooperate to achieve that goal. At one of those meetings, a proposal was developed specifically for the Horticulture major. I subsequently presented this proposal to the Horticulture Undergraduate Curriculum Committee, where it was approved. This memo seeks to notify your office that we have approved the following articulation.

The Proposal

1. The Horticulture Department advises that the following classes be accepted as transferable as “Lower Division Transfer” (LDT). At a minimum, they would be considered to count as electives toward an OSU degree.

   VMW 101 General Viticulture (3) = HORT LOT
   110 Fall Vineyard Practices (4)
   111 Winter Vineyard Practices (4)
   112 Spring Vineyard Practices (4)
   113 Summer Vineyard Practices (4)
   134 Wines of the Pacific Northwest (3) = HORT LOT
   260 Soil and Plant Nutrition (4)
   261 Vine Physiology (4)
   252 Vineyard Management (3) = HORT LOT

2. Chemeketa transfer students who complete both VMW 101 and VMW 134, and who subsequently major in the Horticultural Science option at OSU with an emphasis in viticulture*, will have the following OSU courses waived: HORT 111, and 2 plant materials courses.
3. Chemeketa transfer students who complete VMW 252, and who subsequently major in the Horticultural Science option at OSU with an emphasis in viticulture*, will have the business course requirement waived.

4. A student who has completed at least 440 hours of Cooperative Work Experience in Viticulture will not have to do another internship, although they will have to write the standard internship report as a Horticulture graduation requirement. These work hours will be accrued while the student was working full–time (40 hours a week).

* What this means is that the student completes the Horticultural Science option, and includes in their curriculum our department’s upper-division viticulture courses.

Benefits of the Proposal

This proposal will benefit both the students and participating institutions.

Students: The greatest benefit for the students will be that they can fully participate in the Chemeketa classes, and complete a B.S. in Horticulture, without being forced to enroll in more than 180 credits. I have calculated the course totals as an example.

Baccalaureate Core: 37 credits (10 upper-division credits must be taken at OSU)

Horticulture Common Core: 58 credits (32 upper-division credits must be taken at OSU)
(without Hort 111)

Hort Science Option: 51 credits (35 upper-division credits must be taken at OSU)
(without business and plant materials classes)

Chemeketa Viticulture electives 33 credits

Total Credits 179

College and University: Using this strategy, the structure and integrity of both the Chemeketa and OSU majors are maintained without conflict between the programs. Students will be enrolling in the full range of classes in both programs instead of choosing one school over the other. The upper–division curriculum integral to the Horticulture program will not be compromised in any way. This will also allow both schools to market their programs to a group of students not presently served: those with a focused interest in viticulture who also desire a 4 – year degree.
