A primary goal of IIFET is to improve the interactions between academia, trade, and government officials in all countries about fisheries and aquaculture policy and factors that affect international trade in seafood. Since 1994, IIFET's Executive Committee has recognized this key role by giving the IIFET **Distinguished Service Award**.

A primary goal of IIFET is to improve the interactions between academia, trade, and government officials in all countries about fisheries and aquaculture policy and factors which affect international trade in seafood and, since 1994, IIFET's Executive Committee has recognized this key role by giving the IIFET Distinguished Service Award.

The Distinguished Service Award is given to an individual who has made significant contributions and had an important effect on the ability of individuals in these different professional areas and countries to exchange information, data, and perspectives on fisheries issues. A further consideration in choosing the recipient is the individual's contribution to the theory and/or application of economic science to international fisheries industries, trade, management, and/or policy.

The Distinguished Service Award winner will receive a commemorative plaque and be invited to give an address at the next IIFET biennial conference (IIFET 2020 Galicia).
