

PREVIOUS RANGELAND MANAGEMENT  
PROGRESS REPORT

These progress reports are available upon request from the Eastern Oregon Agricultural Research Center, Star Rt. 1 - 4.51 Hwy. 205, Burns, Oregon 97720.

<u>Special Report 549, 1979</u>	<u>Page</u>
Cool, clear water - water - water - - - - -	1
Streambank erosion in a Blue Mountain stringer meadow in response to livestock and big game grazing management - - - - -	2
Effects of haying and non-use on flood meadow vegetation - - - - -	5
Effect of harvest date and drying procedures on germination of <u>Kochia prostrata</u> (L.) Schrad - - - - -	8
Response of understory vegetation in mountain big sagebrush habitat types after spray release - - - - -	11
The response of bunchgrasses to prescribed burning in mountain big sagebrush plant communities - - - - -	14
Effect of harvest date on five bunchgrasses of eastern Oregon - - - - -	16
Anticipated forage responses and economics of fertilizing eastern Oregon rangelands - - - - -	20
Bugs in the range ecosystem - - - - -	24
Diets of grazing animals using common range in eastern Oregon - - - - -	25
Improved beef production from forested rangelands - - - - -	29
Seasonal response of bitterbrush to burning and clipping in eastern Oregon - - - - -	35
Herbicides for control of western juniper - - - - -	37
 <u>Special Report 586, 1980</u>	
Economics of spraying sagebrush - - - - -	1
Seasonal flammability of big sagebrush and western juniper foliage - - - - -	3
Burning, haying, grazing, and non-use of flood meadow vegetation - - - - -	7
Forty years - inside and out - - - - -	10

Special Report 586, 1980 (continued)

Forage quality of cereal aftermath - - - - - 13

Sediment potentials and high intensity storms on rangeland - - - - - 16

Remote sensing inventory of elk habitat in the Blue Mountains - - - - - 19

Sheep and deer grazing on lodgepole pine plantations - - - - - 22

Rotational grazing for farm flocks - - - - - 25

The effect of grazing on survival and growth of trees planted in a  
northeast Oregon clearcut - - - - - 28

Plant succession as influenced by habitat type, grazing management, and  
reseeding on a northeast Oregon clearcut - - - - - 32

Cattle grazing potential on clearcuts - - - - - 35

Grazing management of crested wheatgrass range for yearling steers - - - - 38

Federal land use policy: Improving citizen participation project -  
an overview - - - - - 42

Special Report 620, 1981

Effect of fire on herbaceous yield of sagebrush-bunchgrass range - - - - - 1

Effects of early spring grazing on Yamhill wheat yield - - - - - 3

Food habits of deer and cattle grazing in common on a sagebrush-  
bunchgrass range in northeast Oregon - - - - - 5

The effect of tractor logging on understory production in eastern  
Oregon's Blue Mountains - - - - - 8

Rotational forward grazing of sheep on improved pastures - - - - - 12

Interpreting coliform counts in northeast Oregon rangelands streams - - - - 15

Infiltration, runoff, and sediment yield in relation to Mount St. Helens  
ash deposition - - - - - 17

Special Report 663, 1982

Improvement in herbicidal control of sagebrush and rabbitbrush - - - - - 1

Soil-plant relationships among three big sagebrush subspecies - - - - - 5

Special Report 663, 1982 (continued)

Hydrologic response following rangeland improvement practices in eastern Oregon - - - - - 10

Effect of defoliation frequency on growth of improved pasture in western Oregon - - - - - 13

Effect of grazing management on diet and weight gains of sheep grazing annual grass - clover pasture - - - - - 16

Special Report 682, 1983

Response to coliform bacteria concentration to grazing management - - - - - 1

Growth and water relations of three big sagebrush species - - - - - 8

Home range size and habitat use by wild horses - - - - - 14

Effects of prescribed burning on bottlebrush squirreltail - - - - - 20

Sheep and timber: are they compatible? - - - - - 23

Effect of sheep grazing on big game habitat in Oregon's Coast Range - - - - 28

Some ecological attributes of western juniper - - - - - 32

Soil ingestion by ungulates grazing a sagebrush-bunchgrass range in eastern Oregon - - - - - 35

Diurnal variation on nitrogen in flood meadow vegetation - - - - - 40

Responses of herbaceous vegetation, planted trees, and cattle on a forest plantation - - - - - 41

Special Report 715, 1984

Riparian shrubby vegetation protection against herbivore grazing - - - - - 1

Water use by western juniper - - - - - 3

Forage sources for eastern Oregon cattle ranches with federal grazing permits - - - - - 7

Seeding rangelands with a rangeland imprinter in eastern Washington and southeastern Oregon - - - - - 15

<u>Special Report 715, 1984 (continued)</u>	Page
Twentieth-year results from a plantation grazing study - - - - -	20
Agroforestry: optimizing livestock and forest productivity - - - - -	25
Remote sensing technology and materials for use in extension programs - - -	34
 <u>Special Report 743, 1985</u>	
Understory herbage response to <u>Juniperus occidentalis</u> removal in central Oregon - - - - -	1
Success of broadcast seeding on untreated, imprinted and channed rangelands - - - - -	4
Cattle and establishment of conifer seedlings: preliminary findings for southwestern Oregon - - - - -	7
Desert shrub community variables and spectral reflectance properties - - - -	11
Winter pasture growth -- working towards an "all-grass wintering system" for sheep - - - - -	23
Riparian erosion inside and outside of exclosures on Mill and McKay Creeks: a validation - - - - -	29
Water use by western juniper: a preliminary model - - - - -	31
