Silvia I. Rondon, Extension Entomologist Specialist • Ken Frost, Plant Pathologist • Robert Cating, Plant Pathology Lab Diagnostician • Ira Thompson, Bio Science Tech Entomology

Potato Field Day

Good weather and great attendance at our Potato Field Day!!!!. We had over 130 plus participants attending this year's field day. Participants learnt about the latest developments from the Plant Breeding, Entomology, Agronomy and Plant Pathology Programs. We THANK YOU for attending Potato Field Day! Special Thanks to Syngenta for providing lunch.....*Silvia Rondon, Extension Entomologist*

Just 5 minutes of your time We would like to know how we are doing. Please take a moment to fill out a simple survey. <https://www.surveymonkey.com/r/6D7KR3D> .

Insect Trapping

Potato psyllids were collected on yellow sticky cards in 5 of our 30 sampling network in Umatilla and Morrow counties fields this week; potato tubeworm were found in 13 locations out of 30; beet leafhoppers in 13 out of 30; aphid counts increased this week. See map [IAEP map](#) for more detail information.....*Silvia Rondon, Extension Entomologist.*

Late Blight

Continue to scout fields for late blight. The general location of any late blight in the Columbia Basin needs to be reported as soon as it is observed so fungicide application for particular areas can be modified accordingly. If you think you see signs or symptoms of late blight, contact Dennis Johnson, Ken Frost, or

Robert Cating to confirm or to make late blight diagnosis. For additional information and to keep up to date with late blight detections at a national level visit <https://usablight.org/>...*Dennis Johnson, Extension Plant Pathologist, Washington State University, Ken Frost, Extension Plant Pathologist, Oregon State University, and Robert Cating, Plant Disease Diagnostician, Oregon State University*

Thanks to the Oregon Potato Commission for sponsoring our trapping and extension efforts. Also, special thanks to Anderson geographic & consulting for sponsoring our interactive map.

Insect Trap Report - The link to the map can be found at <https://goo.gl/8J9MSY>

Area Pest Alert, Umatilla & Morrow County. Traps are collected Thursday. Please note “-1” value means no data
