PTW: Potato Tuberworm
BLH: Beet Leafhopper
OLH: Other Leafhopper

FYI

Welcome to the 2013 Potato Update!!!

We would like to welcome everyone to the 2013 OSU-HAREC Potato Update. Our outlet for information on potato pest issues from Extension. We will continue striving to ensure that we provide our clients with the most objective, science-based information possible.

If you have followed *the Potato Update* in years past, we welcome you back for another season. You can find the *Potato update* online throughout the growing season at <http://oregonstate.edu/dept/hermiston/trap-reports>. Our reports will go out Friday afternoon or Monday morning.

Just a reminder, the Rondon Entomology lab will be offering a workshop on Zebra chip (ZC) and potato psyllid identification this spring. The workshop will be designed to help those in potato production prepare for or review psyllid monitoring techniques and potato psyllid identification. The workshop will have plenty of opportunities for hands-on identification and demonstrations, and will be offered on two different dates. Registration is required (Max 12 per session. Cost: \$30/person). Please respond to this email with your desired time slot to register. Only a few spots left!

The workshops are currently scheduled for:

May 15, 1 – 3:00 p.m.

May 24, 9 – 12:00 p.m.

LATE BLIGHT HOTLINE 1-800-705-3377

The OSU Area-wide monitoring program support is provided by the Oregon Potato Commission and OSU Extension Service. **This is an alert system; growers are encouraged to install their own traps for field specific monitoring.**
