PTW: Potato Tuberworm

BLH: Beet Leafhopper

OLH: Other

PA: Potato Aphids

GPA: Green Peach Aphid

OA: Other Aphids

FYI

We have been picking up growing numbers of grasshoppers on our sticky cards, as well as our D-vac activities on and off the station. It looks like grasshopper populations are up this year.

Current and historical data at:

<http://oregonstate.edu/dept/hermiston/trap-reports>

OSU-HAREC Entomology:

<http://oregonstate.edu/dept/hermiston/entomology-laboratory>

Late Blight Confirmed

Late blight was confirmed north of Pasco on Tuesday, June 21st. No new reports at this time. May have originated from infected seed. For updated information on location of future reports and control information call the **Oregon Late Blight Hot line at 1-800-705-3377**.

The OSU Area-wide monitoring program support is provided by the Oregon Potato Commission and OSU Extension Service. **This is an alert system; growers are encouraged to install their own traps for field specific monitoring.**
