Graduate Student Fellowship -
Molecular Biology, Biochemistry, and Genetics
applied to Crop Improvement

Oregon State University’s Hermiston Agricultural Research and Extension Center (HAREC) seeks an applicant to join an interdisciplinary graduate training program working on complex, emerging issues related to the provisioning of ecosystem services in irrigated agricultural landscapes.

The Molecular Biology Fellow will work on molecular strategies related to crop improvement. Suitable projects include, but are not limited to, increasing vitamins and disease resistance in major staple crops such as potato. A majority of the training will be conducted at the HAREC station in eastern Oregon. The training program involves working closely with other fellows, an interdisciplinary mentoring committee, and a stakeholder committee.

Students should have a B.S. in life sciences or agriculture. Applicants should be U.S. citizens. Individuals from underrepresented groups are encouraged to apply. Applicants should send 1) a CV or resume, 2) a copy of GRE scores, 3) a statement of interest, 4) unofficial transcripts from all undergraduate and graduate institutions, and 5) three letters of reference to Dr. Aymeric Goyer via e-mail to aymeric.goyer@oregonstate.edu.

Please contact Dr. Aymeric Goyer for more information about this position.

Applicant review will begin on February 15, 2013 and continue until a suitable candidate is hired.
