Crosslisted Courses

Crosslisting a course is a mechanism to facilitate multidisciplinary and interdisciplinary instruction. Crosslisted courses are offered by more than one department and a) contain the same number, title, credits, description, and prerequisites; b) have designators that reflect the departments offering the courses; and c) include a distinctive statement at the end of the description to indicate that the course is crosslisted.

Each participating unit must share in the development and teaching of the course. The Schedule Desk will not schedule different courses at the same time and place unless they are crosslisted. Proposing or changing a crosslisted course requires a Category II proposal.

Proposals for new crosslisted and courses can be accomplished with a single proposal, but must include liaison with each participating units’ department heads/chairs and colleges, and with other affected units (i.e. units that may use this course as a prerequisite). Courses must be submitted by each of the departments listing the course, and must include liaison with the other units involved. Changing a crosslisted course can be accomplished with a single proposal, but must also include liaison and will require approval by each of the participating units’ department heads/chairs and colleges.

Additional Information: Category II Proposals

Procedural Change:

When a proposal to create or change a crosslisting reaches the Curriculum Coordinator, an administrative record will be created in the system for the other course(s). The system will illuminate any additional liaison that may need to be added to the original proposal.
