

## Student Affairs Integrated Assessment Conceptualization

Student Affairs Assessment Council—chaired by an “Assessment Champion” who has credibility or can develop credibility with a substantial portion of the division of Student Affairs. The Council and the Chair work to insure that assessment guidelines are in place and that assessment plans are integrated across the division. They would also be charged with insuring that assessment results are reported and followed-up on for continuous improvement.

SA strategic plan would be informed by research and evaluation and would provide powerful data upon which to made decisions, allocate resources, and improve SA at all levels.

Ideally, the Student Affairs Assessment Council would have representation from all departments in the division.
