

Department of Rangeland Ecology and Management

Do you enjoy the outdoors?
Do you want to have a career in the natural resource area?
Are you interested in working towards a sustainable environment?

If you answered yes to any of these questions you may be interested
in a Bachelors of Science degree with the
Department of Rangeland Ecology and Management.

There are many opportunities open to you with a degree in
Rangeland Ecology and Management:

- Rangeland Specialist
- Wildlife Management
- Ranch and Livestock Management
- Wildland Soil Specialist
- Wildland Fire Specialist
- Invasive Plant Specialist
- Watershed or Riparian Specialist
- Restoration Ecologist

The Department of Rangeland Ecology and Management offers several introductory classes that will introduce you to the exciting world of Rangeland Ecology and Management. They are listed as RNG 341 (Rangeland Ecology and Management), RNG 353 (Wildland Plant Identification), and RNG 355 (Desert Watershed Management)
There are no prerequisites to take these classes.
