

24 January 2008

Dear Theriogenology Department Head:

I am the General Manager at Progene Reproductive Centers. Progene is currently looking for an equine veterinarian with reproductive training. We plan to expand our embryo transfer program and our general veterinary practice as well. We would greatly appreciate you forwarding this position announcement to any residents finishing your program or other veterinarians qualified for this position.

Progene is an equine reproductive clinic located in Huxley, Iowa. We offer a wide variety of services for mares and stallions. We stand stallions, collect, ship and freeze semen. We also provide these services for non-resident stallions. In addition, we offer training of stallions to collect to a breeding phantom. Our mare barn has room for 37 mares with services that include: AI, ultrasound exams, uterine cultures, and more. We board mares for foal watch, and occasionally have clients board with us after surgery (Iowa State University Veterinary Teaching Hospital is within 20 minutes) or injury when stall rest is prescribed.

This employment opportunity is posted on the AVMA website and I have included some of our information about the clinic and services we offer. You can use our web address: www.progenerepro.com, to find more information and pictures. If you have any questions, please call any time at 515-460-1848. Thank you for your time and consideration.

Sincerely,

Jason Dreyer
General Manager
