Oregon State University is committed to affirmative action and equal opportunity in employment and education
From the President

At Oregon State University, the momentum continues. On these pages, you will see the people, programs and partners that make this institution so special.

OSU continues to adhere to three guiding goals:

We are committed to creating a compelling learning environment. A group of OSU students who boarded a NASA aircraft to conduct research found just such an environment.

We are committed to becoming top tier in all that we do. A $20 million gift to help boost our College of Engineering into one of the top 25 programs nationally is just one example.

We are committed to having the state of Oregon as our campus. In the fall of 2001, OSU will launch the state’s first branch campus, in Central Oregon.

Paul G. Risser
President, Oregon State University
