Insect Identification Workshop
Know What’s Bugging You!

A workshop designed to train in identification of insects, both beneficial and pest. The hands-on training will include mounting and identifying insects using a stereo microscope and insect key; hands-on instruction; and creating a take-home starter insect pest collection. The focus will be on both pest and beneficial insects of potatoes and wheat. Training will also include insect management and creation of an educational display.

- Enrollment is limited to 20 individuals. Pre-registration is required.
- Registration Fee: $50. Make checks payable to OSU Extension
- Pesticide credits & CCA credits have been applied for from Oregon & Washington.
